

Appl. No. 10/022,186
Amdt. Dated April 13, 2006
Supplemental Response/Amendment

Amendments to the Claims

This list of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A method of providing a broadcast of a station over a telephone, comprising the steps of:

placing a call from the telephone;

telephonically accessing a system capable of connecting to a plurality of broadcast stations registered with the system;

requesting to receive the broadcast of the station;

connecting the call to the station; and

transmitting the broadcast of the station via the telephone.

Claim 2 (previously presented): The method of claim 1, wherein the station is a member selected from the group consisting of radio stations and TV audio broadcasting stations.

Claim 3 (previously presented): The method of claim 2, further comprising the step of providing a menu of identification options for identifying the station, wherein the requesting step comprises the steps of:

selecting an identification option; and

entering the identification of the station under the identification option.

Claim 4 (previously presented): The method of claim 3, further comprising the step of verifying the identification entered.

Claim 5 (previously presented): The method of claim 4, wherein the station is a radio station and the identification is a member selected from the group consisting of call letters, band and frequency, area code, and zip code.

Claim 6 (previously presented): The method of claim 4, wherein the station is a TV audio broadcasting station and the identification parameter is a member selected from the group consisting of call letters, TV channel, area code, and zip code.

Appl. No. 10/022,186

Supplemental Response/Amendment

Claim 7 (currently amended): A method of providing a broadcast of a station over a telephone, comprising the steps of:

- placing a call from the telephone;
- telephonically accessing a system capable of connecting to a plurality of broadcast stations registered with the system;
- selecting an option from a menu of identification options for identifying the station;
- verifying the identification of the station;
- connecting the call to the station; and
- transmitting the broadcast of the station via the telephone.

Claim 8 (currently amended): A system of providing a broadcast of a station over a telephone, comprising:

- a means for connecting to a plurality of broadcast stations registered with the system;
- a means for a listener to access the system by placing a call from the telephone;
- a means for the listener to request to receive the broadcast of the station; and
- a means for connecting the call to the station and transmitting the broadcast of the station via the telephone.

Claim 9 (previously presented): The system of claim 8, wherein the means for connecting to a plurality of broadcast stations enables the system to be connected to a plurality of radio and TV audio broadcasting stations.

Claim 10 (previously presented): The system of claim 9, wherein the means for the listener to request to receive the broadcast of the station comprises:

- a menu of identification options for identifying the station;
- a means for the listener to select an identification option;
- a means for the listener to enter a station identification under the identification option selected; and
- a means for the system to accept the station identification entered.
